

Haftom Giday

Full Stack Developer | Information Technology Student

Addis Ababa, Ethiopia | haftomgiday19@gmail.com | GitHub: github.com/Haftom-Dreamer

Personal Statement

Motivated Information Technology student with a strong interest in software development, backend systems, and building real-world applications. Experienced in developing full-stack projects using Flask and Flutter and building modern web interfaces with HTML, CSS, and JavaScript. Currently developing a ride-hailing platform and continuously improving programming, system design, and problem-solving skills. Seeking internship opportunities to apply technical knowledge, collaborate with professional developers, and gain industry experience.

Projects

Selamawi Ride-Hailing App

Developed a ride-hailing system including backend APIs, mobile applications, and dispatcher management system. Technologies: Flask backend, Flutter mobile apps, OpenStreetMap and Leaflet for maps, REST API architecture.

English Zone Website

Frontend website created for an English learning platform. Focused on responsive layout, clean UI design, and user-friendly navigation using HTML, CSS, and JavaScript.

Movie & Book Tracker

Web application that allows users to track movies and books they have watched or read. Includes list management and simple UI interactions built with JavaScript.

Education

Bachelor of Information Technology

Mekelle Institute of Technology (MIT)

Currently in 3rd Year

Technical Skills

| | |
|-----------------|--|
| Programming | Python, JavaScript |
| Web Development | HTML, CSS, JavaScript |
| Frameworks | Flask, Flutter |
| Tools | Git, GitHub, VS Code, Linux |
| Concepts | REST APIs, Backend Development, Mobile App Development |

Experience

English Teacher – Kids & Intermediate Classes

Teach English lessons to children and intermediate students. Prepare exercises and interactive activities to help students improve grammar, vocabulary, and communication skills.
